

Workers' Compensation doesn't pay for injured workers – YOU DO!

Workers' compensation system errors are commonplace and lead to at least 50% of business being overcharged.

Every dollar the insurance company spends, you are likely to pay back \$2.00 to \$3.00. It's our job to stop employers from paying such high interest rates.

has partnered with AcuComp®, America's Premier Workers' Compensation Cost Control System. AcuComp® works for our clients to insure that your insurance premium is kept at the lowest possible point.

AcuComp® has a documented history of reducing reserves by 30% and lowering experience modifiers by 27 points over time. All open workers' compensation claims are audited multiple times annually for closure and reserve verifications.
