

we sell a PROGRAM which can save your business a significant amount on your workers' compensation insurance premium.

knowledge, experience, and proprietary software system. AcuComp® examines all your claim file documents making sure that reserves reflect the proper unit statistical result. Their unique auditing process insures your experience modifier, and ultimately your insurance premium, are kept at their lowest possible point.

The AcuComp® program is a claim and experience modifier verification system that tracks reserve reductions and subsequent modification verifications through the experience rating process. They execute the program with the use of their proprietary software system and a team of worker compensation experts that detect, correct, and obtain premium refunds. AcuComp® has a documented history of reducing reserves by 30% and experience modifiers by 27 points over time.

Our program produces a multitude of reports, including but not limited to:

- ▶ Actual Liability Avoided
- ▶ Claims under audit
- ▶ Detailed claims status
- ▶ Reformatted loss runs
- ▶ Experience modifier projections, verifications, and promulgations

These reports are designed to keep employers well informed in all aspects of their workers' compensation cost.
